| <input type="checkbox"/> State public health departments | <input type="checkbox"/> Policymakers |
| <input type="checkbox"/> Hospitals, clinics or managed care organizations | <input type="checkbox"/> Other: |

Background on the intervention:

The Residential Student Assistance Program (RSAP) is a substance abuse prevention program developed for high-risk adolescents (14 to 17 years old) living in residential facilities. The program is based on the Westchester Student Assistance Model. It places trained professionals in residential facilities to provide residents with a full range of substance abuse prevention and early intervention services.

Findings from the systematic reviews:

The Substance Abuse and Mental Health Services Administration (SAMHSA) lists RSAP as a model program. See the link below for more information.
